

# Smoking/Vaping Shelter

CONFORMING TO GOVERNMENT LEGISLATION

The Pickering's Portable Smoking / Vaping Shelter provides a designated area for smokers, where they will be protected from the weather, with the shelter design allowing for quick dispersal of cigarette smoke.

Suitable for:

- Corporate Functions
- Office Staff
- Construction Site Workers

The anti-vandal steel construction removes risk of fire and provides ample space for up to 12 people with a full length seating rail providing comfort with a cigarette bin for safe and tidy disposal.

This portable shelter could also be used as a separate vaping area. Giving up smoking is difficult and employers could help support employees with this shelter which would keep people away from smoke and help them resist the urge for a cigarette.

In some industries where there is a heavy flow of traffic and there is a risk of injury from accidents companies have used a Pickering's portable smoking / vaping shelter as a designated area for workers to use their mobile phones away from busy roadways.
