

Storage Units

ANTI-VANDAL

Our storage units are manufactured entirely from steel, with corrugated sidewalls to provide strength and rigidity.

Their robust construction combined with high-security features make them the safest way to store valuable items in unattended, remote or urban sites.

Each Pickering's secure steel storage unit has:

- Double doors
- Door retainers which open outwards
- High security locking system
- Resistant to theft and vandalism

If you need to leave valuable plant and equipment on sites where they are at risk of theft or vandalism, hiring a secure storage unit gives you the confidence that your property will be well protected.

32'	×		×		

Features & Benefits

Standard

In a range of sizes ranging from 10' x 8' to 32' x 10'. To maximise your storage space we provide storage unit racking that can be fitted to one or two sides of the container.

Mobile

Easily towed, one person operation secured and manoeuvred on site. The Pickerings mobile steel store is perfect when you need to move around and keep your equipment secure. Each door is internally hinged for added security and fitted with an integral 5 lever lock with additional provision for a padlock.

Electrics

Lighting board / power supply can be provided as an optional extra.

High Cube

Providing more height than standard storage containers (2890mm), the high cube store is designed to house plant and machinery. This container has the capacity to securely store equipment such as, mini excavators up to 5 tonnes, rollers and dumpers (with fold down ROPS).

Lined & Insulated

Offering additional protection, our lined and insulated stores provide a dry and secure storage solution for items that need extra care. This optional extra includes lighting and sockets.

Chemical Store

The Pickerings COSHH Store provides strong and durable purpose built chemical storage for safely locking away all those hazardous substances including paint, oil and chemicals. Constructed in steel the Pickerings COSHH Store has a raised grated floor above the buns with a lockable door it is vented to allow air flow inside. Steel shelving increases the effective storage space.
