

Fire Rated Cabins

SITE ACCOMMODATION

Pickering's fire rated cabins offer the highest level of protection against fire for your personnel and equipment.

Manufactured to the required specification under the BS EN 13501 standard, the cabins have successfully satisfied independent 3rd party fire testing – achieving the relevant REI (load bearing, integrity and insulation) rating for a 30-minute exposure for the unit structure.

This level of certification means we can offer our clients unit build specification that have been tested and fully comply with the following clauses of the Joint Code of Practice; clauses 13.3 & 13.6.

Features & Benefits

- 30 minute fire rated – third party accredited
- Build specification compliance with JCoP – Clauses 13.3 & 13.6
- Build specification compliance with HSG168 – Appendix 1

Self Closing Shutter System

Multi Point Locking Steel Door

Fire Rated Light Fittings
